

SAFERSTACK®

The greatest innovation in the scaffolding industry since the invention of the frame itself

METALTECH

SAFERSTACK®
A METALTECH INNOVATION

BUILT TOUGH FOR SAFETY

SAFERSTACK®

At Metaltech®, we innovate to make your life easier and safer. We have redesigned the standard frame to maximize the stacking height of a pile by flattening the horizontal tubes diameter from 1.69" to only 1".

From the wisdom of our research and development department, this new product was fully tested by our engineers to ensure the compliance of SaferStack® frames to the most severe standards of the scaffolding industry, including CSA and OSHA. SaferStack® frames are still sturdy and always fit standard Metaltech® frames.

RIGHT HERE
IS THE INNOVATION

- ✓ STACKS IN 30% LESS SPACE THAN REGULAR FRAMES
- ✓ FRAMES INTERLOCK FOR SAFER STORAGE AND TRANSPORT
- ✓ SAFERSTACK® HELPS PREVENT STACKED FRAMES FROM SLIDING
- ✓ SAFERSTACK® FRAMES WERE SEVERELY TESTED TO MEET METALTECH'S STANDARDS FOR STRENGTH AND DURABILITY
- ✓ SAFERSTACK® FRAMES ARE 100% COMPATIBLE WITH ANY STANDARD METALTECH® FRAME

30% LESS

REGULAR

SAFERSTACK

STACKS IN 30%
LESS SPACE THAN
REGULAR FRAMES

WITH SAFERSTACK,
STACK 100 FRAMES
WHERE YOU CURRENTLY
STACK ONLY 70
STANDARD FRAMES.
