GALVANIZED SHORING POST

HEAVY DUTY SERIES

Ideal for contractors and renovation professionals, galvanized post shores provide dependable temporary structural support for new construction, concrete forming, and high-rise projects. They are also essential for structural renovations, wall removal, and supporting sagging floors, beams, and ceilings during foundation and basement repairs.

- Generous adjustment range with holes at each 4" with L-shaped handle for easier fine adjustment
- Model number stamped on each plate for better inventory management
- Can be used as post shores or re-shoring application
- Ideal for outdoor and seaside environments due to its galvanized finish.
