

VEHICLE ACCESS GATE

- Easily movable to accommodate any job site changing landscapes. Saves on reinstallation costs
- Easier to open than traditional gates on wheels
- Adjustable gate angles and height to accommodate most job site soil variations
- Three standard gate sizes to accommodate opening space needs

METALTECH®

**BUILT TOUGH FOR
SAFETY**

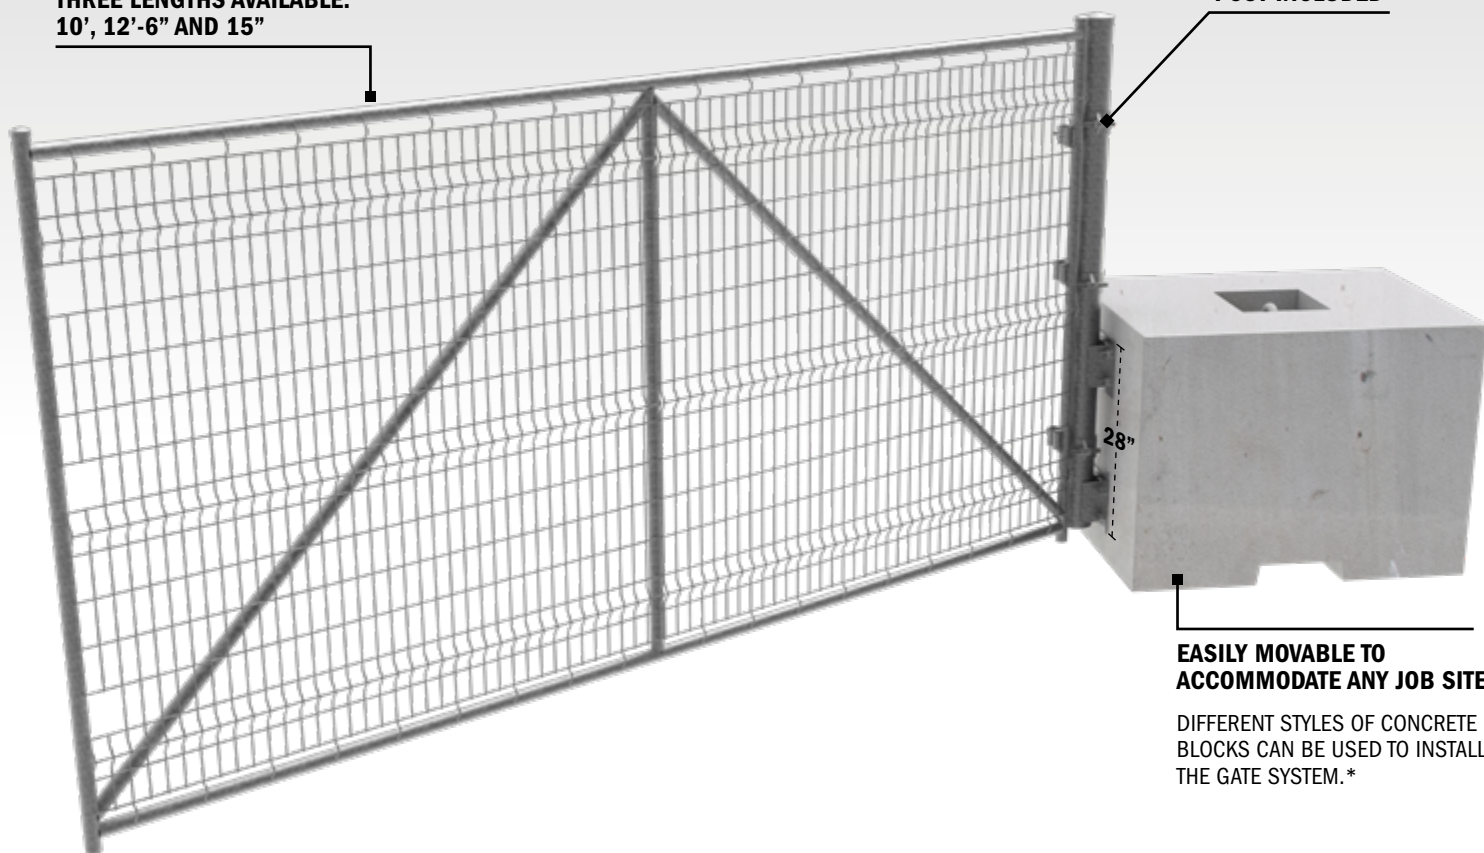

VEHICLE ACCESS GATE

The new freestanding access gate system from Metaltech is designed to simplify and optimize perimeter installations on job sites. It can cover many large openings and provides fast relocation to save time and reinstallation costs.

Simply lift the concrete block anchored to the gate and move it to its new location.

THREE LENGTHS AVAILABLE:
10', 12'-6" AND 15'

HARDWARE AND
POST INCLUDED

- Three standard gate sizes available to use individually or in pair to accommodate 8 different gate openings
- Easily movable to accommodate any job site changing landscapes. Saves on reinstallation costs
- Covers opening from 10 ft to 30 ft
- Adjustable gate angles and height to accommodate most job site soil variations
- Comes with post and hardware
- Easier to open than traditional gates on wheels
- More versatile than cantilever door
